DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17 and 26-29, drawn to a method of forming a stacked device filler, classified in class 438, subclass 15+.
 - II. Claims 18-25, drawn to a stacked microelectronic device, classified in class 257, subclass 750.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of removing a portion of one or more layers of material by chemical etching, you could use the dry etching method to remove the layers.
